DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to a method of flattening non-flat areas of a screen, classified in class 29, subclass 407.07.
- II. Claims 17-21, drawn to a screen assembly and a method of mounting a screen assembly to a vibratory separator, classified in class 209, subclass 309.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product of claim 18 can be made by another materially different process. In other words, the screen assembly for the vibratory separator of claim 18 can be made by any process that produces non-flat screens, rather than by the process for flattening a non-flat screen described in claim 1.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
